THE ROYAL BANK OF CANADA

A Bank With Over 700 Branches

We desire to extend to banks, also commercial and industrial concerns, a cordial invitation to use our services.

CAPITAL \$20,400,000

RESERVE FUND \$20,400,000

TOTAL ASSETS \$479,636,889

We have over 600 branches in Canada and Newfoundland and over 100 in the West Indies, Cuba, Central and South America, as well as in London, Paris and Barcelona.

> Write to us for booklet giving a list of our branches and correspondents.

New York Agency, 68 William Street

Bonds Which Grow Safer

Why Miller First Mortgage Bonds yielding 7%-71/2% are stronger each year

Every issue of Miller Bonds is secured by these fundamental safeguards:

- 1. A closed first mortgage on a single piece of income-producing property.
- 2. Serial maturities whereby a definite part of the bond issue is paid off each year, while the mortgage security remains undiminished
- 3. Monthly payments by the borrower secured by a first claim on earnings of the property, each payment being one-twelfth of the total amount of principal and interest due in a current year. Thus, we always have funds on hand in advance to pay principal and

Miller bonds, paying 7% or 7½%, and safeguarded by these and numerous other protective features, come in denominations of \$100, \$500 and \$1,000, and are available for cash investment or on the partial payment plan.

The Week in Business

The Week in Business

In a Continue to Overcome Seasonal Dullness and the Depressing Influence of Strikes;

Prices Tending Upward.

ESPITE the seasonal let-down in some industries, others forged ahead last week and net results indicated a gain rather than a loss.

In men's clothing fair husiness in fall merchandise continues to be becked. As yet some of the projected price advances have not been made. Retailers in general are not much worried over the possibility of higher clothing prices, although admitting that the advances in raw wool and cloth indicate a higher level for garments. Gains Continue to Overcome Seasonal Dullness and

ahead last week and net results indicated a gain rather than a loss. indicate a higher level for garments. Some slowing-up in the lumber and steel trades is noticed, but the slackening this year appears to be less marked than usual. This also is the case in a number of other trades. This, together with the fact that the railroad, coal and textile strikes have not exerted as depressing an effect on general business as was expected, is taken as evidence that the general situation is improving steadily and that the grant part have

tropical goods.

Pending the American opening, business in spring goods that have been offered so far was slight. A few lines of tropicals have been shown quietly The cotton goods market was gen-

offered so far was slight. A few lines of tropicals have been shown quietly and some business has been booked on the tropical tropicals have been shown quietly and some business has been booked on the tropical tropical tropicals have been shown quietly and some business has been booked on the tropical tropicals have been shown quietly and some business has been booked on them.

Dress goods for fall have improved in demand and jobbers report better prices than have prevailed for some time.

Apparel

Some progress in swinging into the fall season in women's apparel was reported last week. Practically all the manufacturers here are showing their fall models now. Retailers have not rushed into the market to buy, but have placed some fair orders, both in the show rooms and with salesmen on the road. The garment manufacturers are

ing; production gaining.

increasing on fall goods.

duction increasing.

mer goods in the hands of the manu

shackening this year appears to be less marked than usual. This also is the case in a number of other trades. This, together with the fact that the railroad, coal and textile strikes have not exerted as depressing an effect on general business as was expected, is taken as evidence that the general situation is improving steadily and that the gains so far have been based on a solid foundation.

In the textile markets the advances in raw materials, which had become somewhat alarming, appear to have been checked. Cotton fluctuated within narrow limits compared to recent and raw silk showed as fair decline, and raw silk showed a fair decline, and raw silk showed a fair decline, and raw silk showed a fair decline. There is little in the raw material situation, however, to indicate much lower prices in that division according to competent observers.

In finished goods advances are becoming more common. Underwarf or slight advances, The spring 1923 woolen cloth market will be opened today by the American Woolen Company, and it is generally believed that prices will be higher. Slow progress is being made in bringing finished silk prices up to the basis of raw material, the continuelly broadening demand for finished goods.

Distribution at retail continues in large volume, induced, however, by price cutting, which apparently has the lowest point seen in years, and fact, retail prices in many cases are now far below the level indicated by wholesale prices. If the expected and vances in the wholesale market go through, it is evident that consumers will be asked to pay more for many expected. It was though the continuelly broadening demand for first quality dismonds increased the prices and stream the prices and the market will be consumers from the fact that the price and the prices and styles. Evidence the first of July and they are well be asked to pay more for many expected. It was thought the continuely broadening demand for first quality dismonds increased to such an extending the prices and woolens, in addition to t

ATLANTIC COAST LINE RAILROAD COMPANY 4% DEBENTURE BONDS, Due 1939

We own and offer a limited amount of these bonds at 83 and interest, to yield

The Atlantic Coast Line System comprises 13,400 miles of road-4,934 miles operated directly and 8,466 miles operated by subsidiary lines, including the Louisville & Nashville Railroad.

The Company's total assets are valued at over \$300,000,000. Its total bonded debt is approximately \$158,000,000, including this issue of \$4,444,855 fully registered bonds. Available income has averaged well over double bond interest for over 20 years and has never in any single year failed to exceed interest requirements by a substantial mergin. Based on results for the first five months of 1922, the current year

should show approximately \$20,000,000 available to meet bond interest of less than \$7,500,000. Dividends on the common stock have been paid without interruption since 1900.

We consider these bonds directly comparable as to safety with Union Pacific Railroad formerly convertible unse-cured 4's selling on approximately a 5% basis and maturing in 1927. We suggest that holders of the latter bonds consider exchanging them (present market about 95) for the Atlantic Coast Line Debenture 4's at 83. The gain in immediate income, in possibilities of future appreciation, and in the extension of maturity date, should in most cases constitute a complete offset to the relatively unimportant impairment of marketability.

A circular will be mailed on request
